

LE MIRADOR
HEALTH CENTRE

The
excellence
for your
well-being

The Destination on its own

A veritable temple of enhanced wellbeing, Le Mirador Health Centre is an oasis of tranquility nestled in a small, picturesque village overlooking the crystal-clear waters of Lake Geneva.

Located next to the highly exclusive five-star Le Mirador Resort & Spa, the Centre provides an environment with perfect synergies, complete with all the most recent technologies and innovations that go with exceptionally high-quality service.

Set in one of the most spectacular landscapes in Switzerland and indeed in the world, Le Mirador Health Centre is a destination in its own, located in the center of a region, offering a wide range of tourists, sport and cultural activities.

The Philosophy based on balance

Adopting a personalized holistic approach, we seek to achieve harmony of the body and mind by fully restoring the inner strength naturally present in the body. Our programs offer the very best, whether you wish to regain a sense of general well-being, feel invigorated, get into shape, or slow down the effects of time. At Le Mirador Health Centre, we believe that health is all about balance. Enjoying good health means maintaining stability on all levels: physiological, mental, emotional and energetic. Our holistic approach focuses on restoring inner balance by transmitting a selfhealing message to the body's various biological mechanisms.

The medical programs offered at the Le Mirador Health Centre are integrative, combining traditional western medicine and alternative methodologies, based on latest scientific research and experimental medicine. It is a holistic approach to optimize and rebalance your health on various levels, by respecting your individuality. All our predefined expertise programs are carefully combined to enhance the efficiency of each treatment provided. Even though, they are adapted for various purposes.

Our History

In 1904 under survey of architect J.-H. Collombet Mon Repos clinic was built. He wanted the building to give an impression of welcoming palace, more than just a medical establishment. It was specialized in neurodegenerative and gastrointestinal diseases.

The Mon Repos clinic was very well known for its innovative approach and results obtained. 30th of XX century was the clinic's most prosperous period. Ravel and Dutilleux, French composers, created a number of excerpts from their works during their stay here.

The Second World War brought a lot of changes. Many doctors and other medical professionals were obliged to leave the centre. Due to this unfortunate circumstance the Mon Repos Clinic ceased its activity.

In 1952 Swiss entrepreneur Andre Kurz transformed the old clinic building to "The Mon-Repos Hotel" renovating a large part of the building and then employing once again medical practitioners.

In 1970 American Entrepreneur Joseph Segel and his wife transformed Mon-Repos hotel to "Le Mirador Resort". Since then the establishment has been highly recognized and renowned all over the world.

The Emperor and the Empress of Japan stayed here in 1971 during their official visit to Switzerland.

Harvard Business School selected the resort as its European Center for selected courses and Abell, Gabarro, Hayes, Jack Kennedy, Milton Brown, Pr. Larreché made their number of lectures within these walls.

In 1974 Mr Segel decided to integrate a wellness aspect into the clinic by creating a new aisle with treatment rooms and swimming pool; later this was named a SPA in the hotel industry. This aspect of the hotel being of a great innovation for this era in Europe.

In 1998 Le Mirador was the first non-smoking hotel in Europe. He developed accompanied stop-tobacco detoxification cures. Unfortunately, hotel guests didn't welcome this idea, even though many were looking for pure alpine air. Mr Segel decided to abandon this project; he was seemingly too ahead of his time!

In 1999 due to the boom in Health and Wellness, the center focused on developing revitalization and regeneration treatments using the latest innovations in anti-ageing and disease prevention programmes.

In 2018 the Le Mirador Health Centre was extended, hence, offering a numerous spectrum of medical services.

Today the Le Mirador Health Centre offers a vast number of specialties from Sport injuries medicine, Age, Stress and Weight management programmes to specialist consultations of Cardiologist, Gynecologist, Endocrinologist and Dermatologist.

The array of treatments given reflects the spectacular panoramic setting between the Lake Geneva below and the mountains around, embedded in a dab of cotton cloud.

« I contemplated the lake, the waters were placid, all around was calm and the snowy mountains...

the calm and heavenly scene restored me, and I continued my journey»

– Mary Shelley

The tailor-made approach

Health is a synergy of various aspects: balanced physiological, mental, emotional and energetical state.

The medical programmes offered at the Le Mirador Health Centre are integrative, combining traditional western medicine and alternative methodologies, which are based on the latest scientific research and experimental medicine. It is a holistic approach to optimize and rebalance your health on various levels, by respecting your individuality.

All our predefined expertise programmes are carefully combined to enhance the efficiency of each treatment provided. Even though, they are adapted for different purposes. The importance is to create a tailor-made approach, such as personal age health, stress and weight management.

Before each initial programme, a medical consultation is provided. This includes a full physical examination, followed by in-depth laboratory tests and diagnostics. With this data, we will be able to adapt selected programmes to personal requirements and advise on different specialties.

Through the process of supporting the body's inherent regulatory forces, the body will return to a healthy - balanced state called homeostasis. With the methods and applications used in our centre, we initiate complete body detoxification, tissue purification and immune system reload to restore natural and individual mechanisms of self - healing.

All of these treatments are accompanied by individualized and outstanding customer services, respecting personal security and privacy, to obtain equilibrium on its own.

- Personal follow up prescription

Glossary

Colon hydrotherapy | Colon Cleansing (CHT)

Colon hydrotherapy or colonic irrigation is an excellent opportunity to restore and maintain optimum colon health. Colon hydrotherapy, will help you deal with so-called dysbiosis, a disturbance due to an imbalance between the digestive tract and intestinal bacterial flora, often due to frequent intakes of denatured food lacking nutritional value, stressful lifestyles, insufficient exercise, obesity, environmental toxins, pollution and overuse of certain medications etc. Correct nutrition will help towards a more balanced bacterial flora, necessary in maintaining a healthy body function.

Medical Ozone Therapy

This method helps towards regulating and activating scavengers and cellular antioxidants and enhances an immune response effect, releasing different sorts of cytokines and interferon, then cleans arteries and veins by breaking up red blood cell clumping. It helps the elimination of oxidized toxins, chelates heavy metals and reduces pain and inflammation.

The General Hyperthermia

Fever is a condition, in which the body starts to stimulate its natural defense system and self-healing forces. The wholebody hyperthermia contributes to this natural process.

As the body temperature is increased, the number of white blood cells accelerate. The metabolism rate is improved and non-cellular immune factors (e.g. specific humoral enzymes, complement system, interferon, etc.) are activated. At the same time, all sort of secretion processes of the body is stimulated.
